### DETAILED ACTION

This office action is a response to Applicant's amendment submitted September 5, 2008, wherein claims 5, 9, 10, 12, and 28 are amended and claims 6 and 29 are canceled. Claims 1-5, 7-28, and 30-35 are pending and are examined on the merits herein.

Claims 1-5, 7, 8, and 26-35 are directed to allowable products. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 9-25, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on January 12, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with George Loud on September 19, 2008.

The application has been amended as follows:

In claim 1, last line, change "symbol  $m + p$  is an integer from 1 to 20" to "symbol  $m + p$  is an integer from 2 to 20."

In claim 2, page 3, second line from the bottom, change "symbol  $m + p$  is an integer from 1 to 20" to "symbol  $m + p$  is an integer from 2 to 20."

In claim 9, second to last line, change "symbol  $m + p$  is an integer from 1 to 20" to "symbol  $m + p$  is an integer from 2 to 20."

In claim 10, page 7, third line from the bottom, change "symbol  $m + p$  is an integer from 1 to 20" to "symbol  $m + p$  is an integer from 2 to 20."

In claim 12, change "comprising at least one dianhydrosugar alcohol selected from the group consisting of" to "wherein said dianhydrosugar alcohol is at least one member selected from the group consisting of."

Cancel claim 13.

In claim 34, insert a period at the end.

In claim 35, insert a period at the end.

***Reasons for Allowance***

In view of the cancellation of claims 6 and 29, all rejections made with respect to those claims in the previous office action are withdrawn.

In view of Applicant's amendment submitted September 5, 2008, wherein claim 28 was amended to delete the species "1,2-anhydro-annitol," the rejection of claim 28 under 35 USC 112, second paragraph is withdrawn.

In view of Applicant's arguments submitted September 5, 2008, the rejection of claims 1, 3-5, 7, and 9 under 35 USC 102(b) as being anticipated by Satoh et al. is withdrawn. Applicant's arguments are persuasive. Due to the protection of the C3 and C4 positions in Satoh et al., the product of Satoh is linear and not branched. The instant claims require that at least one R in formula (1) or at least one of R<sub>2</sub> and R<sub>3</sub> in formula (2) is hydrogen (not protected). This leads to formation of a branched product and is not taught by Satoh et al.

The following is an examiner's statement of reasons for allowance: the claimed method is neither taught nor fairly suggested by the prior art, as discussed above. Satoh is considered the closest prior art but does not teach or suggest a branched product.

The claimed hyperbranched polymers and method of making the same is adequately described by the specification in such a way as to enable one skilled in the art to practice the invention. Examples 1-4 on pages 7 and 8 of the specification

Art Unit: 1623

describe how to prepare the claimed hyperbranched polymers and provide analytical data which supports the formation of a hyperbranched polymer.

In view of the information discussed above, the indicated subject matter is allowable over the prior art.

Accordingly, Applicant's amendment submitted September 5, 2008 and the Examiner's amendment set forth above are sufficient to remove all rejections made in the prior office action and to place the application in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LAYLA BLAND whose telephone number is (571)272-9572. The examiner can normally be reached on Tuesday - Friday, 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anna Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
